Topic of the Quarter Share Insurance Fund

The Share Insurance Fund is backed by the full faith and credit of the United States. Credit union members have never lost a penny of insured savings at a federally insured credit union. Federally insured credit unions are required to indicate their insured status in their advertising and to display the official NCUSIF insurance sign in their offices and branches.

The NCUSIF provides all members of federally insured credit unions with **\$250,000 in coverage for their single ownership accounts**. These accounts include regular shares, checking accounts, money market accounts, and share certificates. Individuals with account balances totaling \$250,000 or less at the same insured credit union are fully insured.

If a person has more than \$250,000 at any single credit union, several options are available for additional share insurance coverage because NCUSIF provides separate insurance for other accounts.

To get more information about share insurance, visit NCUA's YouTube channel or visit ncua.gov.
